

# PANEL DISCUSSIONS

Several Panel discussions will be organized during the IUMS meeting. The scope is to provide a forum for discussion of hot topics and possibly identify cutting edge actionable suggestions for microbiologists and policy makers. Each Panel discussion will be moderated by a chair who will introduce the topic, and this will be followed by a moderated discussion with panelists with questions from the audience.

The Panel Discussions are open to all registered delegates.

<b>CLIMATE CHANGE AND MICROBE-DRIVEN SUSTAINABLE SOLUTIONS</b>	Hall: Auditorium
